Career Objective

To leverage my strong foundation in frontend development and passion for creating engaging user experiences, I seek a junior web developer position where I can contribute my skills to deliver innovative and visually appealing websites that exceed client expectations and drive user satisfaction.

Skills

Expertise: HTML • CSS • Tailwind • React

Comfortable: Bootstrap • JavaScript • ES6 • MongoDB • ExpressJs

Familiar: NodeJs

Tools: VS Code • Figma • Netlify • Vercel

Projects

Toy Marketplace
Live Link | Github •Client •Server

This a CRUD based Toy Shop management website.

1. It prominently displays product images, descriptions, and pricing information.
2. It has easy navigation after login to make customer attracted to the products.
3. To make it relevant, only the person posting for the toys can delete and edit the toys.

Technologies: This website is built using React in frontend and ExpressJs and MongoDB on the backend. For authentication and deployment, Firebase is used.

Work Experience

SEBPO

CS OFFICER

Dhaka, Bangladesh • March 2021 – Present

I am currently working as a customer service officer for a BPO company to attend the queries and complaints of the customer they have regarding the magazine.

Education

BRAC UNIVERSITY

MAY 2016

Bachelor of Science in Electrical and Electronics Engineering
